Kennel Inspection

Remarks

***Actions which are directed to be taken are not all that may be required of the kennel operator to come into compliance.
The kennel operator is responsible for taking any and all actions necessary to come into compliance.***

The inspection of the kennel took place on April 4, 2019. There were 163 dogs located on the premises at the time of this inspection. The 2018 kennel license was viewed along with the state forms exemption letter. The 2019 kennel license is pending approval. The inspection was performed with State Veterinarian, Dr. Ward and Supervisor Penn.

The inspection of April 4, 2019 is as follows:

207(b) / 21.29(c) - Housekeeping/Pests:

Wardens observed rodent feces on the floor along the building walls and underneath the primary enclosures. Wardens observed an accumulation of dirt, old food, and debris under the sink in the small wash room. Wardens observed a rodent nest between an outside wall and set of dog enclosures. Wardens observed two lights out over the enclosures in the main room along the side wall. Wardens also observed chain link that was distorted and sharp in this set of enclosures.

This warden directs that the kennel operator take the following action(s):

The buildings and grounds of kennels shall be maintained, kept clean and in good repair to protect the animal from injury and to facilitate practices required by this chapter. Kennels shall have an effective program that controls ingress by insects, ectoparasites and avian and mammalian pests. Evidence of insects, ectoparasites and avian and mammalian pests or conditions that would allow or encourage infestation in a kennel are indicative of an ineffective program and unsanitary environmental sanitation in the kennel.

Reg Other - 21.30 Condition of Dog:

Wardens observed dogs with long toenails that needed trimmed, two dogs with severe matting, and two dogs with leg injuries in need of x-rays.

For the above reasons these dogs were ordered to have a veterinary examination, and a cruelty referral was made to the Pennsylvania SPCA.

This warden directs that the kennel operator take the following action(s):

An employee of the Department may visually observe the physical condition of a dog sheltered at a kennel. A dog sheltered at a kennel shall be free of infectious and contagious diseases, and shall be in general good health. If a dog exhibits signs of poor health, the kennel owner shall have proof of adequate veterinary care for the dog.

402(d):

A veterinary examination was ordered on a dog under section 402(a) based on warden's observations of the condition of dogs during inspection. Kennel is in compliance with section 402(d) because veterinary examination was completed within the 72 hour time frame.

**A follow-up inspection will take place at a later date and time.
